

Are you paying ATTENTION?

Play our new interactive game and learn about Adult ADHD

What is it?

'Attention Grabber' is an innovative interactive game which tests your attention and aims to raise awareness of attention deficit hyperactivity disorder (ADHD) in adults.

Come and play the game and learn more about adult ADHD through our short film.

The game was developed by MindTech Healthcare Technology Co-operative for mental healthcare. It is playable daily through the 'Screens in the Wild' interactive screens at 2 locations in Nottingham (and 2 more in London).

Screens in the Wild is a collaboration between the University of Nottingham and University College London, investigating how interactive screens can benefit public life.

Where?

When?

Broadway Cinema	08:00 - 09:30
